

NANA CEA

Racing Stables

OurTomSawyer

was Patty McPeak's first racehorse in need of rehabilitation.

The following photos depict the visible changes NanaCea Racing Stables achieved using Patty McPeak's **NanaCea Equine Products**. Starting in late summer, 2008, OurTomSawyer began his transformation from infected, underweight, abused horse with imbalanced muscles, into the prize winning specimen you see in the final photos.

#1

Day 1 of OurTomSawyer's rehabilitation program starts at NanaCea Racing Stable. He is thin, and lacks both confidence and presence.

#2

Above is OurTomSawyer at the very beginning of his rehabilitation benefiting from equine chiropractic adjustment.

#3

OurTomSawyer toward the end of the first month of rehab. This photo captures his improved posture, coat texture and muscle tone.

#4

Above is OurTomSawyer on the last day of the first month of his rehab program. This photo captures strengthened posture, coat luster and fuller muscle tone. He appears more self confident, as well.

#5

Above, OurTomSawyer in the Winner's Circle at Turf Paradise Thoroughbred Race Track in Phoenix Arizona, April 19, 2009.
